

Bespoke Glass Panels - User Guide

Welcome to our configurator for glass panels. Liveconfigurator™ Bespoke Glass will hopefully save time by speeding up the process, and avoiding having to make templates or complex drawings, and should ensure that your glass will fit perfectly. It is also possible to adding holes wherever you need them. We have started configuring rectangles and parallelograms, and we will be adding more shapes to choose from.

You can select different shapes and multiple panels. Pick different thicknesses or colours and choose laminated or monolithic toughened glass. You will receive a quote by email in a short time, as well as CAD drawings of the glass panels which we recommend that you should check with your dimensions before placing an order.

Please read all our information sheets if you are uncertain about anything. You can also speak to any of our sales staff who will be pleased to help or advise with any questions you may have.

Please also check that the glass you choose meets any required building regulations. Different situations have different requirements, so again please check if you are uncertain.

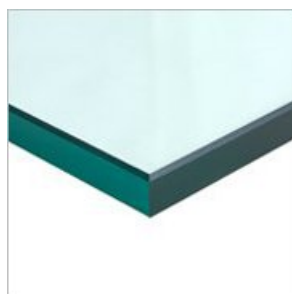

Simply follow the questions when they appear and make your choices. Useful information and guidance may appear as you go through the questions. You can choose to add more identical panels or create new sizes, with or without holes of your chosen diameter.

We also stock a large range of popular sizes of toughened and laminated panels in different thicknesses, which may save you time and be cost effective. You will find a chart of standard sizes along with product codes is shown on our Glass configurator.

If our configurator doesn't offer your shape, please contact our helpful sales staff for a special quote. It is very likely that we can still produce whatever you need.

Things to be aware of:

- Glass can be very heavy and awkward to handle. We tell you the weight of the panels and offer handling accessories.
- Glass panels can have a tolerance of $\pm 2\text{mm}$.
- Glass panels are delivered on our stillages. These can be refunded on return.
- Please double check your drawings before placing your order.
