

Liveconfigurator: Ritec Coating

New ClearShield Eco-System™

Ritec's revolutionary new ClearShield Eco-System™ for glass is the first and only technology with performance, added value and profit guaranteed at every step of the glass supply chain - specifier, processor, fabricator, contractor, installer, and end user.

The ClearShield Eco-System™ for glass is unique because it is both 'new and proven' - a combination of a) new technical and commercial developments with b) proven performance and durability. This innovative combination adds real value, both tangible and intangible, at each step of the glass supply chain.

The ClearShield Eco-System™ for glass is 'proven' because its core technology, the polymeric resin of award-winning ClearShield® durable, "non-stick," easy-clean glass surface protection, has not changed since its introduction in 1981 and is still the first and only liquid-applied glass surface treatment proven through real life experience to be:

Non-stick	Non-reactive after curing, working like "non-stick" cookware - always much easier to clean and keep clean.
Durable	Resists attack by Moisture, Alkalinity and Dirt ('MAD'), the main enemies of glass, maintaining the original visibility, clarity and cleanability.
Strong performance	Resistant to all types of dirt, organic (e.g. motor vehicle exhaust or traffic film, bird droppings, tree sap) and inorganic (e.g. hard water deposits, building run-off, metal oxides) – suitable for all types of glass, exterior and interior.
Versatile	Easily applied at any step in the glass supply chain - with opportunities for diversification and differentiation.
Green	Reduces energy requirements for routine glass washing by 50% on average for lower emissions and carbon footprints as well as savings in time, effort, and money.
Light-enhancing	Maintains original light transmission and day-lighting - for improved productivity and well-being of building occupants.
Anti-microbial	Resistant to adhesion and growth of bacteria, viruses, and fungi - for applications where hygiene is paramount.
Non-hazardous	Not classified as flammable or toxic - for safe and easy application in factory or on-site.
Tried and tested	Over extended periods of time under actual field conditions for all types of glass (new or old, exterior, or interior) in all types of locations (urban, countryside, seaside) and in all types of environmental conditions (hot, cold, dry, humid, windy, sandy).

Part of a complete system – renovation, protection, maintenance – for solutions to ‘Problem Glass’ with opportunities for diversification and differentiation.

Based on these key advantages, Ritec ClearShield®, during more than 35 years actual field experience, has developed a perceived value in each market sector of the flat glass industry. In addition, Ritec has, periodically, improved the proprietary chemical cross-linking system, inhibitors, and stabilisers of ClearShield®, which together determine its performance and durability.

The next generation of award-winning Ritec ClearShield® includes:

- further improvements in performance and durability
- ‘multi-functional’ - works on any glass, anywhere, anytime
- ‘super-green’ - reduces by 50% on average the energy requirements and carbon emissions for routine washing of architectural glass
- new ways of creating added value, both tangible and intangible, at each step of the glass supply chain

The ‘new and proven’ ClearShield Eco-System™ guarantees performance such as maintaining the original:

- light transmission - for visibility and daylighting in buildings, energy output of solar panels both thermal and photovoltaic
- clarity - for bright and sparkling appearance
- cleanability - for reduced frequency and difficulty of cleaning exterior glazing and improved hygiene for interior glass

Maintenance of Ritec coated glass

Ritec coated glass can be cleaned with glass cleaner, or warm soapy water and a soft cloth.

Any Questions?

If you have any questions which are not covered here or in our Frequently Asked Questions, please contact one of our branches around the UK and speak to one of our team, who will be happy to help, or email: info@liveconfigurator.co.uk or call us on: 01708 398 020

Prefer to be local? Our branches are found in:
